fuel partner who delivers certainty.*

*The Future Feels Like*

# Fuel You Can Trust

LPI's natural gas fueling and CNG services provide reliable, flexible supply backed by 24/7 monitoring and logistics so your operations never miss a beat.

## Natural Gas Fueling Solutions

Flexible **sourcing & supply** options including pipeline gas, CNG, RNG, and field gas tailored to your needs

**Processing & blending fuel streams** engineered to meet engine and project specifications

Custom **on-site distribution and storage solutions** to ensure fuel is delivered safely and reliably

## Full-Service Natural Gas Supply

### Interconnect & Source Development

We handle the entire process—from **interconnection and contracts to infrastructure construction**—ensuring seamless access to natural gas supply, all supported by 24/7/365 gas control and monitoring.

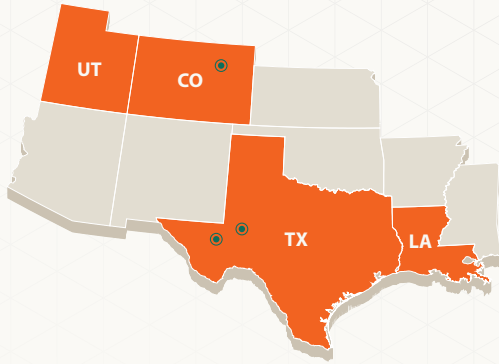

### Supply & Logistics Management

LPI secures your **fuel supply, transportation, and price stability**. With flexible **hedging and pricing options**, customers can *flexibly balance cost certainty and market advantages* to fit their strategy.

### Storage & Virtual Pipeline

Our **on-site storage solutions and virtual pipeline logistics** reinforce reliability and provide fuel access even in *remote or hard-to-reach locations*.

● Compression Facilities    ■ Gas Operations

## Why LPI CNG?

**Proven Expertise:** More than a decade of operational success supporting and maintaining over 3,500 pieces of rotating equipment across North America.

**Trusted Foundation:** Backed by Liberty Energy a publicly traded company (LBRT) with a strong balance sheet and deep energy infrastructure experience.

**Future-Ready:** Integrated expertise across fueling, generation, and power management.

## Comprehensive Services, Built for Reliability

From fuel source to power production, LPI ensures a secure, reliable, and efficient supply of natural gas. Our CNG services go beyond fuel delivery—they're the *foundation of dependable energy* for customers powering today and preparing for tomorrow.

### CNG Delivery & Distribution

Secure, efficient fueling delivered and managed on-site

### Fuel Conditioning

Gas quality adjusted to meet engine requirements and improve efficiency

### Processing & Optimization

Remove impurities, create sellable byproducts, and ensure the highest fuel performance

### Flexible Integration

Services that can act as primary, supplemental, or backup supply, depending on customer needs
