

**Power that works 24/7/365 isn't negotiable**  
and dependable isn't a promise—it's our practice backed by  
over a decade of power monitoring, maintenance and expertise.

The Future Feels Like

# Dependable Power

We design and operate modular, scalable energy systems that grow with your needs—from 25 MW to 1 GW. Our proven track record backs our promise to deliver the *reliability, resiliency, and security* needed to power what's next.

## Modular, Scalable, Redundant Systems

Our power plants are built for resiliency and flexibility. Multiple generators and power blocks run in parallel, optimizing delivery to specific loads while ensuring redundancy.

With a ready inventory and dedicated production slots, LPI delivers speed-to-market solutions with power running in as little as 12 months.

## Remote Operations Center

Maintain **99.999% uptime** through LPI's remote operations, providing round-the-clock *oversight, predictive maintenance, and rapid response*.

### Continuous Operations Monitoring

Powered by a robust cloud-based network.

### 24/7 Real-Time Support

Remote operations team and plant technicians on-site daily.

### Predictive Analytics

Detect abnormal operation issues early to minimize downtime and extend equipment life.

### Networked Redundancy

Plant operations are seamlessly replicated locally for an added layer of operational backup.

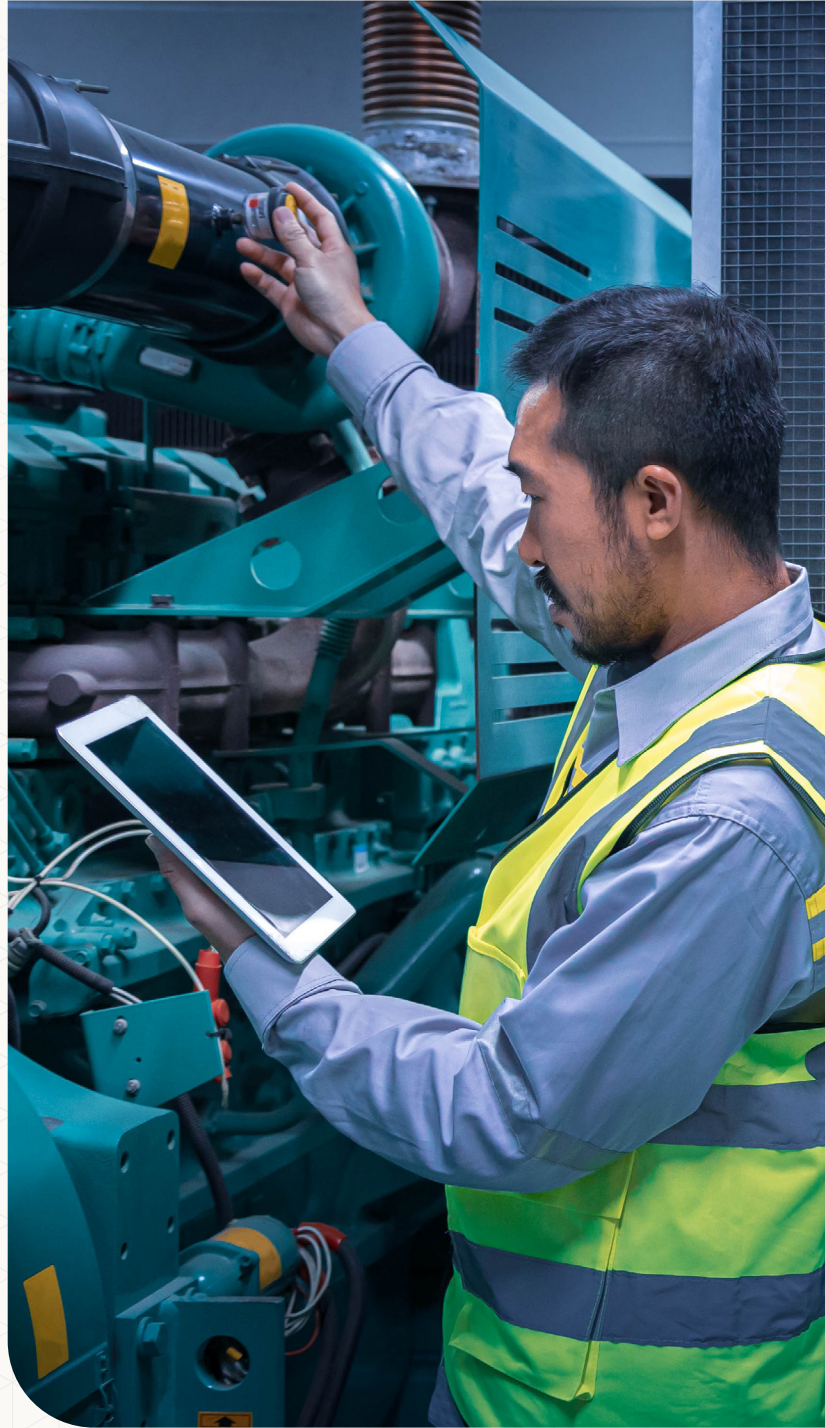

## Manufacturing, Operations, & Maintenance Leadership

LPI combines **strategic equipment design** with deep partnerships across the supply chain and a fully staffed O&M team ensuring top-tier service and long-term reliability.

- Over **3,500 pieces of rotating equipment** under active maintenance across North America
- 1,000+ highly trained technicians** provide on-site and remote maintenance backed by 24/7 ROC team
- Publicly traded since 2018, with a **robust portfolio of owned assets** backed by a strong balance sheet

## Cybersecurity & Reliability

We integrate advanced, cyber-secure systems to protect critical infrastructure and guarantee safe, uninterrupted operations. Customers benefit from secure access, resilient platforms, and protection against evolving threats.

## Operations Footprint

With major offices, manufacturing and maintenance facilities, across North America, we're well-positioned in key operation markets

★ District Offices   ● Manufacturing   ■ Maintenance   ▲ Gas Compression
